EDUCATION

Bachelor's Degree (B.Tech AI & Data Science) *Nov 2020 – March 2024*

- Easwari Engineering College, Ramapuram, Chennai

HSC *June 2019 – March 2020*

- Don Bosco Matriculation Higher Secondary School, Peravallur, Chennai

SSLC *June 2017 – March 2018*

- Don Bosco Matriculation Higher Secondary School, Peravallur, Chennai

WORK EXPERIENCE

AI Red-Teaming Specialist (Contract) | Outlier *July 2024 – May 2025*

- Authored model-breaking web-research tasks in BrowseComp and GAIA formats targeting frontier LLM failures.
- Discovered obscure facts via OSINT and verified answer keys against primary sources and archives.
- Traced model search trajectories and reasoning chains to diagnose root causes of task failures.
- Reviewed peer-authored tasks for ambiguity, answer uniqueness, and source integrity before benchmark submission.

AI Benchmark Task Author (Contract) | Mercor *June 2025 – Apr 2026*

- Designed multi-hop reasoning and reasoning-trap prompts that reliably exposed weaknesses in SOTA models.
- Tested tasks against leading LLMs, confirming reproducible failures across repeated model runs.
- Distinguished genuine model limitations from prompt ambiguity using run logs and intermediate outputs.
- Scaled validated model-breaking patterns across new domains while maintaining precise, unambiguous task wording.

AI/ML Intern | BAE AI *Apr 2026 – June 2026*

- Built an AI-powered intent engine that transformed natural language shopping queries into structured recommendations.
- Developed recommendation and response orchestration pipelines using TypeScript, Node.js, React, MongoDB, and Express.js.
- Implemented ranking algorithms and retrieval workflows to enhance recommendation accuracy and relevance.
- Executed 250+ automated tests and managed performance benchmarking and Docker-based deployments.

AI Engineer | Neeroma Technologies *June 2026 – Oct 2026*

- Worked on Yantra, a multi-agent platform, evaluating LLM agent behavior across design, deployment, and ticketing workflows.
- Debugged L5 Deploy Agent trajectories, tracing tool calls and reasoning steps to diagnose agent failures.
- Built L6 Tickets Agent triage logic and test cases exposing edge-case failures in agent decision-making.
- Verified QLearn AI tutor outputs for factual accuracy and grounding, flagging hallucinations in contextual Q&A.
- Used observability logs and regression tests to isolate root causes of agent failures.

AI Red-Teaming Specialist & Pod Lead (Contract) | Turing *Oct 2026 – Nov 2026*

- Authored verifiable web-browsing benchmark tasks that exposed reproducible failures in frontier LLMs.
- Built multi-source tasks around recent primary documents, decoy sources and official legal records.
- Reviewed peer-authored tasks, validating golden answers and tracing model search trajectories to root causes.
- Developed a Python review pipeline and dashboard to score model runs and verify task sources.
- Promoted to Pod Lead, overseeing task quality and review standards for a team of trainers.

PROJECTS

RepoMind – AI-Powered Code Repository Analysis Using LLMs

- Developed an end-to-end Generative AI system to analyze and understand code repositories, providing insights from project structures.
- Applied NLP techniques to process repository data, extract meaningful context, and generate concise summaries.
- Designed the solution with modular pipelines and prompt engineering to deliver accurate outputs.
- Github: https://github.com/samadarsh/RepoMind

BiteWise: Smart AI Food Ordering & Nutrition Platform

- Developed an end-to-end multi-tenant application featuring a FastAPI backend, Next.js frontend, and a Streamlit developer playground.
- Implemented secure per-user Swiggy OAuth 2.1 authentication with PKCE, incorporating AES-256-GCM encryption at rest.
- Designed a robust Order Safety State with budget caps, idempotency protection, and COD constraints to prevent duplicate ordering.
- Approved by Swiggy Builders Club, integrating official Swiggy MCP APIs for agent-driven meal search and checkout workflows.
- Live app: https://bite-wise-theta.vercel.app

OPEN SOURCE CONTRIBUTIONS

OpenClaw

- Fixed the macOS VM installation guide to provision Node.js before OpenClaw, resolving installation failures on fresh VMs.
- Improved the VM guide's Gateway setup and host-browser dashboard access using SSH tunneling and the dashboard pairing flow.

OpenAlgo

- Fixed WebSocket market-data timestamps for Upstox and Zerodha, correctly exposing exchange trade time across quote & depth feeds.
- Resolved a master-contract race condition during concurrent login/download operations and added regression tests.

TECHNICAL SKILLS

Programming, Frameworks & Tools

- Python (NumPy, Pandas, Scikit-learn), SQL
- LangChain, LangGraph
- Hugging Face Transformers
- TensorFlow & PyTorch
- FastAPI, Flask, Git & GitHub
- OpenAI API, Gemini, Groq, Ollama
- MCP Tool Calling

Machine Learning & Generative AI

- Agentic AI & Multi-Agent Systems
- LLMs, Prompt Engineering
- Natural Language Processing
- RAG Pipelines & Vector Search (FAISS, Pinecone, Chroma)
- Machine Learning Algorithms (Supervised & Unsupervised)

AI Evaluation & Red-Teaming

- BrowseComp & GAIA Task Authoring
- LLM Red-Teaming & Adversarial Prompting
- OSINT & Primary-Source Verification
- Model Trajectory Debugging & Failure Analysis

PUBLICATIONS

- An Integrated Framework for Food Recognition, Nutritional Insights, and Meal Recording – Journal of Jilin University (Engineering and Technology Edition) — ***Journal Publication***
- An Integrated Framework for Food Recognition, Nutritional Insights, and Meal Recording – 3rd International Conference on Deep Sciences for Computing and Communications — ***Conference Presentation***
- Music Genre Classification by Deep Learning Techniques – ISTE Sponsored International Conference on Latest Trends in Science, Engineering, and Technology — ***Conference Presentation***

CERTIFICATIONS & ACHIEVEMENTS

Certifications:

- Google Data Analytics – ***Coursera***
- Python Masterclass – ***Udemy***
- Mastering Model Context Protocol – ***LinkedIn Learning***
- Advanced Data Science – ***SkillsPire Technologies***
- Cybersecurity Infrastructure Configuration – ***Palo Alto Networks***

Achievements:

- Swiggy Builders Club — Selected Member
- Student Leadership — Event Management Head, Student Council of Artificial Intelligence & Data Science Department (2023–2024)
